

LIVER SUPPORT

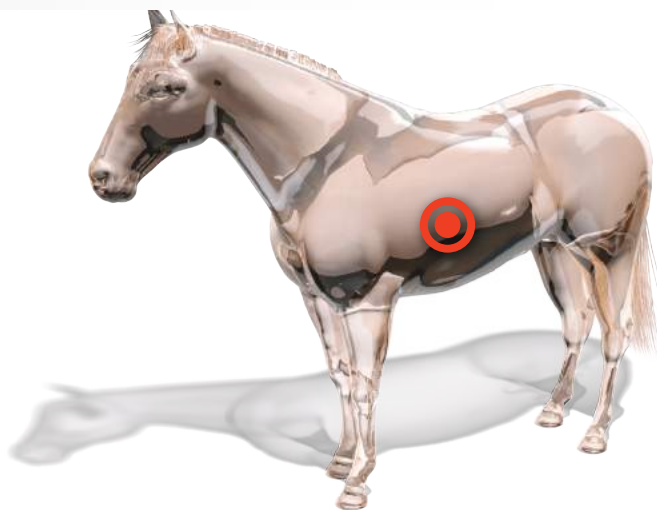

Real Results

FOR THE COMPLETE HORSE

- Platinum Liver Support

Start with a Solid Foundation

Platinum Performance® Equine contains omega-3 fatty acids, antioxidants and vitamins, such as C and E, that address wellness, help maintain healthy levels of inflammation and also help support liver function during heightened states of oxidative stress that can be present when liver health issues occur.

Platinum Liver Support

Comprehensive Liver Support Formula

Platinum Liver Support is a unique blend of ingredients that supports liver function and hepatocyte health. These ingredients provide a precursor to glutathione for additional antioxidant support.

Recommendations for use

Administer 1 level scoop (12,200mg) once daily. If necessary, mix with a small amount of molasses and immediately administer with an oral syringe. Serving based on the average horse weight of 1000 lbs.

Ingredients Milk Thistle Phytosome Complex* (*Silybum marianum*/*Glycine max* soybeans) [Fruit/Beans], Natural Vitamin E (d-alpha tocopheryl acetate), N-Acetyl Cysteine (NAC), Taurine, Vitamin C (ascorbic acid). *Siliphos® is a trademark of Indena S.p.A

** Do not administer to pregnant or lactating mares. Not designed for use in foals. Should not be used concurrently with nitroglycerin. May decrease the efficacy of activated charcoal.*

Size	Servings
0.8 lb	30
1.6 lb	60

Active Ingredients per scoop (12,200mg)

Natural Vitamin E (d-alpha tocopheryl acetate)	1,615 IU
N-Acetyl Cysteine (NAC)	2,070mg
Taurine	1,940mg
Vitamin C (ascorbic acid)	720mg

SUPPLEMENTING FOR LIVER HEALTH

What are the Benefits of the Ingredients in Platinum Liver Support?

- **Silymarin**, a flavonoid and natural component of milk thistle, has antioxidant properties and can be supportive when fibrosis is a concern. It may also help manage acute inflammation.
- **Vitamin E**, a potent fat-soluble antioxidant, supports the liver against free radical damage, which is common in most forms of liver disease.
- **N-Acetyl Cysteine** (NAC) is a sulfur-containing compound which may support healthy glutathione levels in the

liver. Glutathione plays an important role in cellular detoxification.

- **Vitamin C** is a water-soluble antioxidant that helps to change oxidized vitamin E back to active, reduced vitamin E. Vitamin C, when alone or combined with vitamin E, has been shown to support liver function.
- **Taurine** is a sulfur-containing amino acid that helps to support hepatocytes from oxidative damage and helps maintain protection against fibrotic damage.

Healthy Liver Function

Platinum Performance® Equine

Helps maintain healthy liver function with omega-3s, antioxidants and vitamins.

Advanced Liver Support

Platinum Liver Support

Advanced liver support for horses experiencing liver health issues.
